Ian Riley

UX/UI Designer & Front-End Developer

I design web and app interfaces, then write the front-end code that ships them.

Kansas City, MO • hello@ianriley.co • ianriley.co • linkedin.com/in/ian-riley

SKILLS

UX/UI Design
UI Design, User Flows, Interaction Design, Prototyping, Accessibility (WCAG 2.2)

Design Systems
Design Tokens, Component Libraries, Theming, Documentation

Front-End
React, TypeScript, Tailwind CSS, TanStack

Brand & Graphic Design
Brand Identity, Logo Design, Motion Design, Typography

TOOLS

Figma · After Effects · Photoshop · Illustrator · Affinity · Claude Code · GitLab

SELECTED WORK

ianriley.co 2026
A token-based design system whose accessibility and Lighthouse checks fail the build if a score slips.

Lumin 2026 · concept · coded prototype
Ten screens from catalog to enrolled, and nobody needs an account to browse.

Northwind 2026 · concept
Six marketing pages and three account screens built around one ask: start a free trial.

Aperture 2026 · concept
A lens mark built on a grid, with usage rules written for people who aren't designers.

EXPERIENCE

UX/UI Designer & Front-End Developer 2024 – Present
International Academy of Science

- Designed 50+ web and app pages for Acellus, an online learning platform used by over a million students.
- Helped create, and help maintain, a 100-component design system in Figma and with Claude. It replaced a bloated stylesheet full of duplicate components, so one fix now reaches everywhere a component is used.
- Build designs into shippable pages with React, TypeScript, Tailwind CSS, and TanStack.
- Work project by project with the programming team, from a kickoff that scopes the work to a retrospective on the result and the process, tracked in GitLab.

Graphic & Motion Designer 2022 – 2024
International Academy of Science

- Made motion and graphic design in After Effects and Photoshop.
- Moved into UX/UI and front-end development in 2024.

Freelance Designer 2014 – 2022
Self-employed

- Built a client base of esports orgs and influencers, starting at 13.
- Creative Director at Noxious Gaming for a year: set the org's visual identity and directed its creative output.
- Graphic designer for Buzzkill Esports and Animosity Esports, six months each: matchday graphics, roster announcements, and results posts.

EDUCATION

Self-taught Designer – 12+ years
Graphic & UX/UI design · Since 2014

Cybersecurity coursework
Coursera · 5 courses · 2025
