Ian Riley

Product Designer & Front-End Developer

I design products and the design systems behind them, then write the front-end code that ships them.

SELECTED WORK

This Site 2026
The design system behind this site, built and tested in public.

Lumin 2026 · concept
Course discovery and sign-up, designed with no dead ends.

Northwind 2026 · concept
A SaaS marketing site, from brand mark to sign-in.

Aperture 2026 · concept
A full visual identity, logo through guidelines.

EXPERIENCE

Web Designer & Front-End Developer — 2022 – Present
International Academy of Science

- Design web pages for Acellus, an online learning platform.
- Created and maintain the design system that keeps the product consistent.
- Transform designs into shippable pages with React, TypeScript, Tailwind CSS, and TanStack.
- Work in sprints alongside the programming team, planning and shipping work through GitLab.
- Use Claude Code to boost development efficiency and productivity.

Creative Director — 1 year
Noxious Gaming

- Directed the visual identity and creative output for the organization.
- Produced social media and brand designs for players and the org.

Graphic Designer — 6 months
Buzzkill Esports

- Made matchday graphics, roster announcements, and results posts.
- Kept the org's look consistent while working within its existing brand.

Graphic Designer — 6 months
Animosity Esports

- Made social designs and matchday graphics on a weekly turnaround.

Freelance Designer — 2014 – 2022
Self-employed

- Built a client base of esports orgs and influencers as a teenager.
- Specialized in social media designs and brand assets across multiple organizations.
