Ian Riley

UX/UI Designer & Front-End Developer

I design web and app interfaces, then write the front-end code that ships them.

Kansas City, MO • hello@ianriley.co • ianriley.co • linkedin.com/in/ian-riley

SKILLS

UX/UI Design
UI Design, User Flows, Interaction Design, Prototyping, Accessibility (WCAG 2.2)

Design Systems
Design Tokens, Component Libraries, Theming, Documentation

Front-End
React, TypeScript, Tailwind CSS, TanStack

Brand & Graphic Design
Brand Identity, Logo Design, Motion Design, Typography

TOOLS

Figma · After Effects · Photoshop · Illustrator · Affinity · Claude Code · GitLab

SELECTED WORK

ianriley.co 2026
A token-based design system whose accessibility and Lighthouse checks fail the build if a score slips.

Lumin 2026 · concept · coded prototype
Ten screens from catalog to enrolled, and nobody needs an account to browse.

Emberwake 2026 · live
Doré's engravings re-inked live in WebGL, in a story that waits for the reader's hands.

Northwind 2026 · concept
Six marketing pages and three account screens built around one ask: start a free trial.

Aperture 2026 · concept
A lens mark built on a grid, with usage rules written for people who aren't designers.

EDUCATION

Self-taught Designer – 12+ years
Graphic & UX/UI design · Since 2014

EXPERIENCE

UX/UI Designer & Front-End Developer 2024 – Present
International Academy of Science (Acellus)

- Designed 50+ web and app pages for Acellus, an online learning platform used by over a million students.
- Helped create and maintain a 100-component Figma design system.
- Using Claude, replaced a bloated stylesheet full of duplicate components so one fix now reaches everywhere.
- Build designs into shippable pages with React, TypeScript, Tailwind CSS, and TanStack.
- Work project by project with the programming team, from kickoff to retrospective, tracked in GitLab.

Graphic & Motion Designer 2022 – 2024
International Academy of Science (Acellus)

- Proficient in motion and graphic design using After Effects and Photoshop.

Freelance Designer 2014 – 2022
Self-employed

- Built a client base of esports orgs and influencers.
- Graphic designer for Buzzkill Esports and Animosity Esports, producing matchday, roster, and results graphics.

LEADERSHIP

International Academy of Science (Acellus) 2024 – Present
Alongside the UX/UI role

- As the only designer, the go-to for 20+ programmers over the years on design, specs, issues, code, and company questions, so the project manager can focus on the bigger picture.
- Answer the programmers' daily “which token or component?” questions, so the product stays consistent.
- Train new developers, review teammates' code every day, and help set the standards for the design system.

Co-owner & Lead Designer 1 year
Third Studio

- Co-owned the studio and managed its team of 4 designers.

Creative Director 1 year
Noxious Gaming

- Set the esports org's visual identity and directed its creative output.
